Citation :

Portable Start Menu is a simple and free start menu application that can be installed on USB sticks or local PCs.

Organize your programs in a simple menu system and launch them via a tray icon. If you close Portable Start Menu on an USB-Stick, running applications can be closed automatically, too.

Main features:

Organize and launch applications via a tray menu

Closes running applications on USB-Sticks automatically

Checks if an application has been changed before execution

Quick Start functionality to start applications with a few keystrokes

Automatically mount/dismount TrueCrypt container

Runs on USB-Sticks without leaving any traces on a host PC

Portable Start Menu is Freeware

Additional functions on USB sticks:

Create an autorun file to automatically launch Portable Start Menu

Close running applications when you exit Portable Start Menu

Safely remove your USB-Stick
