Le même outil de réparation adapté pour Win 7 (corrige 21 erreurs...souvent après passage d'un malware)

<http://leelusoft.blogspot.com/2009/12/7-quick-fix.html>

- \* Enable Task Manager
- \* Enable Command Prompt
- \* Enable Registry Editor
- \* Enable Folder Options
- \* Reboot After Update (stops "You must restart for changes to take effect" after updates)
- \* Update Shutdown (prevents updates hijacking sleep button when there are updates to do)
- \* Show Shutdown
- \* Slow Thumbnail
- \* Restore Aero Function
- \* Disable IPv6
- \* Enable IPv6
- \* No DVD Drive
- \* Installer Crash
- \* Slow Menu
- \* Theme Changes (prevents themes changing cursors and desktop icons, but changes everything else)
- \* System Tray (fixes missing system tray icons after updates)
- \* Enable Taskbar Properties
- \* Taskbar Context
- \* Win-X Shortcuts (re-enables disabled Win-X shortcuts)
- \* Display Properties (re-enables)
- \* Control Panel (re-enables)
