Yo .o/

La 0.9.47 est sortie.

Citation :

New features:

- Self-signed certificates created with FileZilla Server are now signed using SHA-256
- Interface settings (as opposed to server settings) are now stored in %APPDATA%/FileZilla Server
- Increased maximum IP filter size for users and groups by 50%
- The administration protocol now allows up to 16 million users and groups

Bugfixes and minor changes:

- Fix sporadic crashes when using FTP over TLS
- Fix timestamps in LIST output being off up to 7 minutes in extreme cases
- Speed up querying file attributes
- Auoban did not work over IPv6
- Fixed selection in user list sort dropdown behind the corresponding toolbar button
