Re,

En fait elle réapparaît au prochain redémarrage. donc, voici la manip de Comodo pour la faire disparaître :

"Thank you for contacting COMODO

We apologize for the inconvenience. The grey window is from Comodo Message Center. We have already escalated the bug to our developers and they are working on it. For time being, you can remove the graphic image from Comodo Internet Security by navigating to Tasks > Advanced Tasks > Open advanced settings > General Settings > User Interface > Remove the check mark for "Show messages from COMODO Message Center" > Click on Ok."
