Merci en retard de la nouvelle **jmimile**, je viens de lire ceci et c'est une bonne nouvelle:

- 1) The window of active hours for when you are using your PC has been increased from 10 to 12 hours under Settings > Update & security > Windows Update and "Change active hours".
- 2) We have updated Windows Defender to not show recap notifications in normal mode if no scans have been run, or in scan-only mode if no threads have been found.
