Bonjour,

Mise à jour cumulative **KB3197954** passage à la **build 14393.351**

https://support.microsoft.com/fr-fr/kb/3197954

Comme d'habitude redémarrage nécessaire.

Installation effectuée sans problème

Note: *le bug d'affichage du nettoyeur de disque de Windows à été corrigé, en tout cas il n'est plus présent chez moi*

Les correctifs qu'apporte cette **KB3197954** :
Citation :
This update includes quality improvements. No new operating system features are being introduced in this update. Key changes include:

 - Improved reliability of Internet Explorer 11, Start, File Explorer, action center, graphics, and the Windows kernel.
 - Addressed issue that was causing System Center Operations Manager (SCOM) Management Console to crash in State view.
 - Addressed connectivity issue from a 32-bit application to a Remote Desktop Gateway that doesn't have HTTP tunneling enabled.
 - Addressed issue of updates not being restored when doing a system reset, even if those updates were permanently installed.
 - Addressed issue that was causing domain logon attempts to fail on a Windows 10 Pro device after upgrading from Windows 10 Home.
 - Addressed issue that was causing failed logon counts of non-admin users without network logon permissions to be counted as cumulative, resulting in devices going into BitLocker recovery more frequently.
 - Improved support for websites by updating the HTTP Strict Transport Security (HSTS) preload list.
 - Improved support for IT administrators using Group Policy to block users updating the operating system from Windows Update.
 - Improved reliability and stability of the notification framework for enabling contextual notifications in File Explorer.
 - Addressed an issue that prevented System Center Configuration Manager from performing inventory uploads via Background Intelligent Transfer Service (BITS) when Encrypting File System (EFS) has been disabled.
 - Addressed additional issues with USB, Wi-Fi, clustering, setup, Microsoft Edge, Internet Explorer 11, licensing, PowerShell, Component Object Model (COM), Windows kernel, graphics, and

Bluetooth.
