Merci à Tous

J'ai trouvé la solution:

WITH T AS

(

SELECT CASE WHEN i.Type_ID =1 THEN 'Carte identité'

WHEN i.Type_ID =2 THEN 'Passeport'

WHEN i.Type_ID =3 THEN 'Carte séjour' END as TYPDOC,

i.ID as NumID, C.Cod_Client, C.Montant,

ROW_NUMBER() OVER(PARTITION BY ID ORDER BY Type_ID) AS N

From Credit as C

LEFT OUTER JOIN ID_Client i on C.Cod_Client=i.Cod_Client

)

SELECT * FROM T WHERE N = 1;
