Bonjour,

Comme certains on pu certainement le constater **mbam-clean** ne fonctionne pas avec **Malwarebytes 3.0**, ou tout du moins il ne fait pas sont travail de désinstallation jusqu'au bout (il reste des dossiers et fichiers)

Mais c'est maintenant de l'histoire ancienne puisque Malwarebytes vient de sortir **MB-clean** (ne pas confondre avec "mbam-clean")

Ce nouveau utilitaire, permet de désinstaller toutes les version de Malwarebytes...
