Derniers changements (en Anglais)

Version 2.13 (2017.04.06)

- Preserve 'GPT for UEFI' option if the user changed it before selecting an ISO
- Fix unwanted notification sound when closing with the X button
- Fix inability to restore the minimized application after a popup is displayed
- Fix an issue when trying to install Syslinux/NTFS twice in a row
- Work around Microsoft's inconsistent casing of device IDs during device enumeration
- Work around Microsoft's aggressive locking of partitions in Windows 10 Creators Update
- Restrict write sharing permissions when accessing a device
- Update libcdio and GRUB 2.0 to latest

C'est comme d'habitude ici :

Pour la 2.14 :

Rufus 2.14 (2017.04.10) [BUGFIX RELEASE]

Fix inability to create BIOS-bootable drives, in some circumstances, due to write sharing permissions
