Fossamail va fermer en mai

<http://www.fossamail.org/>

"We will be shutting down FossaMail in May.

Since there hasn't been any response whatsoever, through any channel, to the request for new maintainership, we'll be shutting down FossaMail.

The user base is obviously too small to contain anyone willing to step forward to do the required release engineering and support, so we're bidding the fossa farewell.

No further official releases will be made, we'll shut down the website and support forum (@ Pale Moon), and everyone currently using FossaMail should be looking for a replacement mail/chat/news client within the next few months to avoid running into potential security vulnerabilities as time goes on.

Thank you all for your years of support!"
