Je reviens sur StartisBack...

Sur leur site, ils disent :

<http://startisback.com/#download-tab>

Version ++2.0.1 «Creators Update» 26 March 2017

NEW: Full taskbar skinning! Windows 7 and Windows 8 taskbar styles included

NEW: Improved configuration UI for finer personalization

NEW: Ability to change style of taskbar and start menu context menus

NEW: PC Settings can be expanded into menu

Improved PC Settings search

Improved dynamic high DPI support for start menu, orb and configurator

Added support for opening files via drag&drop on metro app icons in start menu

Lot of minor improvements and various bugfixes

J'espère Tof que tu as pensé à installer cette version (je présume la réponse mais je me dois de poser des questions "bêtes")
