Microsoft est au courant du problème et recherche la cause, il est fort probable qu'un correctif soit proposé.

Citation :

Known issues in this update

After you install this update, Internet Explorer 11 may close unexpectedly when you visit some websites. When the problem occurs, you may receive an error message that resembles the following:

We were unable to return you to [previous URL]

Internet Explorer has stopped trying to restore this website. It appears the website continues to have a problem.

The problem may occur if the website is complex and uses certain web API's.

Microsoft is researching this problem and will update this article when more information becomes available.
