Bonjour,

Copiez le contenu ci-dessous dans une fenêtre du bloc note, et enregistrez le fichier en tant que settings-menu.reg

Double-cliquez sur le fichier REG pour appliquer les paramètres au registre

(ne s'applique qu'au compte actuellement utilisé et ne nécessite pas les droits administrateur).

Cliquez avec le bouton droit de la souris sur une zone vide du bureau

et vous verrez le menu contextuel en cascade "Paramètres" au milieu.

(fichier .txt disponible en pièce jointe)

Windows Registry Editor Version 5.00

```
[HKEY_CURRENT_USERSOFTWAREClassesDesktopBackgroundShellSettings]
```

```
