[U][B]DreamMail 6.0.0.40 CN[/B]/[U]

[https://www.upload.ee/files/8332863/dm6\\_setup6.0.0.40.7z.html](https://www.upload.ee/files/8332863/dm6_setup6.0.0.40.7z.html)

Changelog

1. Improved: Improved sqlite database engine, using VAL mode to improve efficiency
  2. Change: Remove some styles when writing letters, reduce the probability of being listed as spam by Tencent
  3. Change: Which Invalid Filters to Skip When Applying a Filter
  4. Change: When the mail MailFrom fails, the error message is improved.
  5. Change: The bug that the picture in the email cannot be displayed when the sent and draft email is re-edited
  6. Change: The database cache mode in the option is turned off by default (because some users often fail to shut down the software normally, resulting in frequent database repair)
  7. Change: Some Exchange servers send eml type attachments, and the other party may receive an attachment of 0 KB.
  8. Increase: In the high dpi mode, automatic adjustment of the text size of the mail display
  9. Change: Some other text and use experience small improvements
- Special note: If you downgrade to dm5, you must replace the dm6 sqlite3.dll dm5, otherwise there will be dm5 prompt password error
