Tu as raison Wullfk, c'est 10 jours.

Pour ma part, je n'attends pas 10 jours, j'utilise le nettoyeur de disque de Windows 10, histoire de libérer un peu d'espace.

Voilà un aperçu de l'article:

"If you delete the previous version, the only way to rollback is to do a clean installation of Windows 10. However, if you don't delete these files manually, the system eventually will delete them automatically after ten days of the upgrade."
