Version 3.30

Release notes for this version

Screen clipping tool accessible via Paste menu or Start

Monitor Select for whole-desktop screenshots to quickly crop them

Automatic updater that updates NPS Image Editor in place and downloads in the background.

Default is still to prompt for download but you can make this fully automatic if you want!

Paste button updates itself if Print Scr is pressed while NPS window is open

New setup wizard and icon

Hide "NPS Instance Manager" window from Alt+Tab

Ability to paste transparent "Format17" images from web browsers or Print Scr

Fix Warp tool being unable to select Southwest

Fix Window menu having a completely blank title for windows with no document open

Detect Windows 11 version

Renamed "Rotate 270" to "Rotate 90 Counterclockwise" to be more intuitive

Added file formats for command line or otherwise: clipboard, npsobj://

Updated color of buttons when dragging a file into NPS

Set default update check frequency to once a week
