BD3D2MK3D v1.24 (July 25, 2022):

- Added the animation tuning parameter for x264. (Strangely, it is not mentionned in the help of x265.exe - Thx tOXicSilence!)
- Replaced MVCPlanes2OFS.exe with the more robust OFSExtractor32.exe (v1.1-beta2-1) to extract the 3D-Planes from the MVC video stream. Thanks to TheGreatMcPain/Sixsupersonic and t19922006 !
- Updated x264 to the latest version (v0.164.3095)
- Updated x265 to the latest version (v3.5+37)
- Updated avs2yuv to the latest version (v0.24bm6)
- Updated the mkvtoolnix tools to the latest version (v69.0.0 'Day And Age')
- Replaced the dead link for Info->CinDe Version with a search on DuckDuckGo
- Java version: Replaced the obsolete link to the AdoptOpenJDK web site to the current Adoptium site containing the latest free Eclipse Temurin JDK version.
