v1.29 (November 28, 2022)
- It is now possible to convert a MKV created with MakeMKV containing a 3D movie in the non-standard 720p resolution.
- bug fix: The frame rate of any input MKV (in MakeMKV mode) was always 23.976fps.
- bug fix: In MakeMKV mode, the TrueHD tracks were always demuxed (with eac3to) even if they were not selected by the user.
- bug fix: The 2 streams for hardcoded subtitles in Full-SBS/TAB mode were not generated.
- workaround: Wrong tracks order for AVC+MVC 3D MKV created or remuxed with another tool than MakeMKV
- workaround: Demux crash when an audio or subtitle stream doesn't have a language code in the MPLS
- Added BDSup2Sub++ v1.0.4 64-bit beta, as it has less bugs than BDSup2Sub++ v1.0.3 (that will still be used on 32-bit systems)
- Updated x264 to the latest version (v0.164.3101)
- Updated x265 to the latest version (v3.5+68)
- Updated mkvtoolnix to the latest version (v72.0.0 'Minuano (Six-eight)')

v1.30 (December 28, 2022)
- bug fix: Crash in MakeMKV mode when launching the conversion if the input MKV contains curly brackets { } in its path.
