v 12.4.6
optimized app size (code) less 200KB.
using ShadowWhisperer's way to remove Provisioned Appx-es (which fix #52 issue).
NEW! As request , this script will disable security Mitigations (Meltown, Spectre) and more (This is not disabling DEP, because is very important security feature, and needed for anticheats)
NEW! You can make ISO Image with Defender Disabled (to enable , change values in Services).
