QTranslate Community edition by Letavr December 9, 2023

<https://mega.nz/folder/Nrcg2TAb#QWnmED...dxNq5ZDWA/folder/5z8ykLiC>

Differences from the official version:

- * Based on the official portable version of QTranslate 6.9.0 (according to reviews works more stable than 6.10.0);
- * Google Translate script is taken from newer version 6.10.0;
- * Google dictionary script (technically, it was always just a search engine) taken from the newer version 6.10.0;
- * Yandex, Bing (Microsoft Translator), DeepL, Urban Dictionary fixed;
- * Added ChatGPT (configured to work as a translator). Works on the basis of gpt-3.5-turbo-0613;
- * Reverso was added as a translator (previously it worked only as a dictionary). Author of the patch Zloy_Gelud [?];
- * Added translators from Amazon, ModernMT and LibreTranslate, Translatero (thanks to DimitarSerg);
- * Added dictionaries: wiktionary, dic.academic.ru (explanatory), translate.academic.ru (translated);
- * DeepL icon change;
- * Removed (still not working): Prompt, youdao, Baidu, Papago;
- * It uses its own ecstasy (thanks to DimitarSerg).

Community edition (October 27):

- * Translatero translator added (thanks to DimitarSerg);
- * Added dictionaries: wiktionary, dic.academic.ru (explanatory), translate.academic.ru (translated);
- * Microsoft Translator (Bing) now works from the official site (thanks to DimitarSerg);
- * Patchchen Exescher (thanks to DimitarSerg);
- * Fixed with middle click on the name of the translation service (did not work on new services);
