Super est un logiciel pour convertir le format vidéo:

SUPER © supports the conversion (encoding) to most of the above mentioned formats.

To list few examples:

- o drag & drop any VIDEO file and EXTRACT the AUDIO part by converting it to mp2, mp3, ac3, aac & amr\_nb (the last 2 are playable on Nokia) format.
- o convert any type of video <--> to your favorite PocketPC or Mobile phone 3gp/3g2 format (or vice versa).
- o convert Flash containing FLV video to any other format.
- o convert RealMedia files to any other format.
- o convert QuickTime files to any other format.
- o convert Windows Media Files (WMV, WMA) to any other format.
- o convert AviSynth script files (.avs) to any other video format. (Recommended when direct file conversion fails)
- o convert AVI files to <--> any other video format (or vice versa).
- o convert ASF files to <--> any other video format (or vice versa).
- o convert DivX / Xvid files to <--> any other video format (or vice versa).
- o convert MOV files to <--> any other video format (or vice versa).
- o convert MP4 files to <--> any other video format (or vice versa).
- o convert MPG files to <--> any other video format (or vice versa).
- o convert OGG files to <--> any other video format (or vice versa).
- o convert VOB files to <--> any other video format (or vice versa).
- o AutoMode to convert any type of video to VCD, SVCD, DVD.
- o Play all of the above!
